

INDEX TO VOLUME 40

This index has been compiled by Pryce Buckle, and is arranged in three parts: a taxonomic index, a general and geographic index, and an author index. It is designed to signpost users to the article they seek rather than to be a comprehensive index to every reference in the *Journal of Conchology*.

Page references are to the first page of the paper concerned, except for new taxa where the page reference gives the start of the formal description.
