In the recent publication by Amano & Chen (2026), in the legend to Figure 2, the registration numbers for type material were incorrect. Paratype #2 (A, D, E) is NSMT-Mo 82433, the holotype (B, F–J) is NSMT-Mo 82431, and paratype #1 (C) is NSMT-Mo 82432. The figure legend is provided below in its entirety.

REFERENCE

AMANO K, CHEN C. 2026. Two new species of *Pseudoneilonella* Laghi, 1986 (Bivalvia: Neilonellidae) from the southwestern Japan and a redescription of *Neilonella kuroshimaensis* Okutani, 2011. *Journal of Conchology* **45** (6): 1133–1145. doi: 10.61733/jconch/4587

Figure 2. Type specimens of *Pseudoneilonella costata* n. sp. **A, D, E**, paratype #2, left valve, NSMT-Mo 82433. **B, F–J**, holotype, NSMT-Mo 82431: (**B, F, H**) right valve; (**G, I, J**) left valve; (**I**) enlarged view of inner surface of anterior part. **C**, paratype #1, right valve, NSMT-Mo 82432. Abbreviation: pas, posterior adductor muscle scar. White arrow indicates top of pallial sinus. Scale bars = 2 mm.
